POCREP 4 - Immediate Removal - Enviro Chem Site,
Zionsville, Indiana

- 1
D
FROM
- A. Pollution - Actions for cleaning/disposing of tanks and cooling water pond.
 - B. Action - 85,000 gallons of water have been shipped off-site for treatment at the CID treatment facility in Calumet City, Illinois. All above ground tanks have been sampled and compatibility testing is underway. The tanks contain 90,000 gallons of material; 12 tanks are empty. Most all of the tanks contain explosive vapors.
 - C. Problems - The OSC and contractor will meet with the owner of the tanks on Tuesday, August 28, 1984, to determine any problems which may occur in having the tanks removed from the site.
 - D. Future Action - Bulking of compatible liquids and then purging/cleaning of the emptied tanks will begin next week. Cost estimates for transportation and disposal of the tank materials will be solicited.
 - E. Expenditures - To date, approximately \$205,900 have been expended; \$469,100 remains in the project ceiling.
